

## Hydropower Engineering

### Energiewasserbau

Prüfungs-/Studienleistungen K / -	Art/SWS 2V / 2Ü	Sprache E	LP 6	Semester WS	Prüfnr. 251
<b>Dauer der Hausarbeit/-übung</b>					

**Ziel des Moduls**

In this course the students acquire extended knowledge about weir and dam construction as well as subsoil sealing. The students achieve general competences in planning, designing and dimensioning of hydro dams and their foundations. Furthermore, they obtain basic knowledge about economical energy aspects, hydropower station components, – design and utilisation as well as usage of hydro power in coastal areas.

After the successful participation in this course the students are able to

- develop basic construction plans for the construction of water supply and power structures;
- carry out basic stability checks on the respective buildings;
- design the above mentioned buildings for stability against erosion and permeability by application of filter laws;
- basic knowledge of designing the respective structures for the purpose of energy generation.

**Inhalt des Moduls**

- design guidelines, principles of construction and dimensioning concepts for barrages
- different construction types and operation modes of hydropower plants
- river power plants and storage power plants
- design of turbines
- hydraulic design of flood spillways
- dam structures, operation and verification of stability
- FE-analyses of dams; construction of earth
- fill dams and subsoil sealing

Workload	180 h (60 h Präsenz- und 120 h Eigenstudium einschl. Prüfungs-/Studienleistung)
Empf. Vorkenntnisse	Bodenmechanik und Gründungen, Erd- und Grundbau, Strömung in Hydrosystemen

Novak et al., 4th ed., Taylor & Francis; Wasserkraftanlagen, J. Giesecke & E. Mosonyi, Springer Verlag, Heidelberg; Deiche und Erddämme, R. Davidenkoff, Werner Verlag Düsseldorf; Anwendung von Filtern im Wasserbau, R. Davidenkoff, Ernst & Sohn Verlag Berlin.
Medien	StudIP, Script, beamer, blackboard etc
Besonderheiten	none
Modulverantwortlich	Achmus, Martin
Dozenten	Schendel, Alexander; Abdel-Rahman, Khalid
Betreuer	Scheiber, Leon; Song, Junnan
Verantwortl. Prüfer	Schendel, Alexander
Institut	Institut für Geotechnik und Ludwig-Franzius-Institut für Wasserbau, Ästuar- und Küsteningenieurwesen, <a href="http://www.igth.uni-hannover.de/">http://www.igth.uni-hannover.de/</a> und <a href="http://www.lufi.uni-hannover.de/">http://www.lufi.uni-hannover.de/</a> Fakultät für Bauingenieurwesen und Geodäsie
